

Vajgar

Definition The Vajgar typeface is Oldřich Menhart's only poster typeface. The Vajgar typeface was created in 1961, commissioned by the Stráž printing house in České Budějovice and is actually a model for subsequent engraving into linoleum. It could be characterized as a narrow gothic-antiqua, a historicizing typeface with one-sided wedge serifs whose form was derived from calligraphy carried out with an unyieldingly wide and flat writing instrument, either a pen made of reed or a cut piece of wood. Vajgar's fresh and lively draftsmanship is perfect for use in headlines—the characters fit together nicely. Vajgar's addition to the Menhart's font collection is well-deserved.

England in the 16th century was already a centralized state, in which much of the feudal order of Medieval Europe had been swept away. This centralization was strengthened by a good system of roads and a disproportionately large capital city, London.
